P.O. BOX 1460
ALHAMBRA, CALIFORNIA 91802-1460

February 19, 2004

IN REPLY PLEASE
REFER TO FILE: PD-3

The Honorable Board of Supervisors
County of Los Angeles
383 Kenneth Hahn Hall of Administration
500 West Temple Street
Los Angeles, CA 90012

Dear Supervisors:

**BRANDON STREET AND GREEN STREET
NEGATIVE DECLARATION AND AUTHORITY TO PROCEED
SUPERVISORIAL DISTRICT 5
3 VOTES**

IT IS RECOMMENDED THAT YOUR BOARD:

1. Consider the Negative Declaration for the proposed project to reconstruct deteriorating roadway surfaces and to construct new curb, gutter, and sidewalk on Brandon Street and Green Street in the unincorporated area of East Pasadena; concur that the project, with the proposed mitigation measures, will not have a significant effect on the environment; find that the Negative Declaration reflects the independent judgment of the County; and approve the Negative Declaration.
2. Adopt the Mitigation Monitoring and Reporting Program to ensure compliance with the project and conditions adopted to mitigate or avoid significant effects on the environment.
3. Approve the project, and authorize Public Works to carry out the project.
4. Find that the proposed project will have no adverse effect on wildlife resources, and authorize Public Works to complete and file a Certificate of Fee Exemption with the County Clerk.

PURPOSE/JUSTIFICATION OF RECOMMENDED ACTION

The purpose of the proposed project is to reconstruct deteriorating roadway surfaces and to construct new curb, gutter, and sidewalk on Brandon Street and Green Street.

The Brandon Street project extends from 510 feet west of Madre Street extending east to Lotus Avenue. Along this location, Brandon Street is 30 feet wide from edge of pavement to edge of pavement and does not have sidewalk nor curb and gutter except for a 250-foot section on the south side of the street. The existing pavement is in fair to poor condition with longitudinal cracks. The work will involve reconstructing the roadway surface with 4-inch asphalt concrete on 6-inch crushed miscellaneous base to a new width of 40 feet and constructing new curb, gutter, and sidewalk along the entire extent of the project. Eight corner cutoffs, to County standards, will be required to provide 25-foot radius curb returns. Acquisition of right of way will be necessary for these corner cutoffs. Nineteen mature trees, including three oak trees, will be removed.

The Green Street project extends from 490 feet west of Madre Street to 350 feet east of Madre Street. Along these limits, the existing pavement width of Green Street is 30 feet. There are no curbs, gutters, or sidewalks present except at the intersection with Madre Street. The roadway pavement is in fair to poor condition with many visible cracks. The proposed work involves reconstructing the roadway with 4-inch asphalt concrete on 6-inch crushed miscellaneous base at a new width of 34 feet and installing new curb, gutter, and sidewalks. New curb returns and ramps will be constructed at the intersection with Madre Street. Four corner cutoffs, to County standards, will be required to provide 25-foot radius curb returns. Acquisition of right of way will be necessary for these corner cutoffs. Seven mature trees will be removed and three will be root pruned.

IMPLEMENTATION OF STRATEGIC PLAN GOALS

This action is consistent with the County's Strategic Plan Goal of Service Excellence. By implementing the proposed improvements, residents of the County who travel on these roadways will benefit from the enhanced mobility, traffic safety, and air quality.

FISCAL IMPACT/FINANCING

Funding for construction of the project is proposed to be included in the future Road Fund Budget. The estimated cost of the project is \$880,000. A construction contract will be advertised for bids at a later date, contingent on your approval of this action.

FACTS AND PROVISIONS/LEGAL REQUIREMENTS

Under the California Environmental Quality Act, any lead agency preparing a Negative Declaration must provide a public notice within a reasonable period of time prior to certification of the Negative Declaration. To comply with this requirement, a Public Notice pursuant to Section 21092 of the Public Resources Code was published in the *Pasadena Star News* and in the *San Gabriel Valley Tribune* on July 11, 2003. Copies of the Negative Declaration were provided for public review to the Pasadena Public Library. Notices regarding the availability of the Negative Declaration were also mailed to residents in the vicinity of the project.

The public review period for the Negative Declaration ended on August 21, 2003. We received no comments in reference to this project.

Based upon the Initial Study of Environmental Factors, it was determined that the project, with the proposed mitigation measures, will not have a significant effect on the environment. Therefore, approval of the Negative Declaration is requested at this time.

ENVIRONMENTAL DOCUMENTATION

The California Environmental Quality Act requires public agency decision makers to document and consider the environmental implication of their action.

Mitigation measures have been included as part of the project. We have prepared the enclosed Reporting and Monitoring Program that include maintaining records to ensure compliance with environmental mitigation measures adopted as part of this project. Your Board is being asked to approve and authorize Public Works to carry out this project.

A fee must be paid to the State Department of Fish and Game when certain notices required by the California Environmental Quality Act are filed with the County Clerk. The County is exempt from paying this fee when the Board finds that a project will have no impacts on wildlife resources. The initial Study of Environmental Factors concluded that there will be no adverse effects on wildlife resources. Upon approval of the Negative Declaration by your Board, Public Works will file a Certificate of Fee Exemption with the County Clerk. A \$25 handling fee will be paid to the County Clerk for processing. We will also file a Notice of Determination in accordance with the requirements of Section 21152(a) of the California Public Resources Code.

The Honorable Board of Supervisors
February 19, 2004
Page 4

IMPACT ON CURRENT SERVICES (OR PROJECTS)

The project will not have a significant impact on current services or projects currently planned.

CONCLUSION

Please return one approved copy of this letter to Public Works.

Respectfully submitted,

JAMES A. NOYES
Director of Public Works

DEPARTMENT OF PUBLIC WORKS**

**NEGATIVE DECLARATION
FOR
BRANDON STREET AND GREEN STREET**

I. Location and Brief Description

The purpose of the proposed project is to reconstruct deteriorating roadway surfaces and to construct new curb, gutter, and sidewalk on Brandon Street and Green Street.

The Brandon Street project extends from 510 feet west of Madre Street, east to Lotus Avenue. Along this location, Brandon Street is 30 feet wide from edge of pavement to edge of pavement and does not have sidewalk, or curb and gutter, except for a 250-foot section on the south side of the street. The existing pavement is in fair to poor condition with longitudinal cracks evident. The work will involve reconstructing the roadway surface with 4-inch asphalt concrete on 6-inch crushed miscellaneous base to a new width of 40 feet and constructing new curb, gutter, and sidewalk along the extent of the project. Corner cutoffs will be required to provide a total of eight 25-foot radius County standard curb returns. Acquisition of right of way will be necessary for these corner cutoffs. Nineteen mature trees, including three oak trees will need to either be removed or root pruned.

The Green Street project extends from 490 feet west of Madre Street to 350 feet east of Madre Street. Along these limits, the existing pavement width of Green Street is 30 feet. There are no curbs, gutters, or sidewalks present except at the intersection with Madre Street. The roadway pavement is in fair to poor condition with many visible cracks. The proposed work involves reconstructing the roadway with 4-inch asphalt concrete on 6-inch crushed miscellaneous base at a new width of 34 feet and installing new curb, gutter, and sidewalks. New curb returns and ramps will be constructed at the intersection with Madre Street. Corner cutoffs will be required to enable construction of the four 25-foot radius County standard curb returns. Acquisition of right of way will be necessary for these corner cutoffs. Ten mature trees will need to either be removed or root pruned.

II. Mitigation Measures Included in the Project to Avoid Potentially Significant Effects
No significant environmental effects were identified. However, mitigation measures are discussed in Section XVIII of the Initial Study.

III. Finding of No Significant Effect
Based on the attached Initial Study, it has been determined that the project will not have a significant effect on the environment.

INITIAL STUDY OF ENVIRONMENTAL FACTORS

1. **Project Title:** Brandon Street and Green Street
2. **Lead Agency Name and Address:** County of Los Angeles Department of Public Works, 900 South Fremont Avenue, Alhambra, CA 91803
3. **Contact Person and Phone Number:** Mr. Mark Nugent, (626) 458-5957
4. **Project Location:** Unincorporated area of East Pasadena
5. **Project Sponsor's Name and Address:** County of Los Angeles Department of Public Works, 900 South Fremont Avenue, Alhambra, CA 91803
6. **General Plan Designation:** County of Los Angeles
7. **Zoning:** R-1
8. **Description of Project:**

The purpose of the proposed project is to reconstruct deteriorating roadway surfaces and to construct new curb, gutter, and sidewalk on Brandon Street and Green Street.

The Brandon Street project extends from 510 feet west of Madre Street, east to Lotus Avenue. Along this location, Brandon Street is 30 feet wide from edge of pavement to edge of pavement and does not have sidewalk, or curb and gutter, except for a 250-foot section on the south side of the street. The existing pavement is in fair to poor condition with longitudinal cracks evident. The work will involve reconstructing the roadway surface with 4-inch asphalt concrete on 6-inch crushed miscellaneous base to a new width of 40 feet and constructing new curb, gutter, and sidewalk along the extent of the project. Corner cutoffs will be required to provide a total of eight 25-foot radius County standard curb returns. Acquisition of right of way will be necessary for these corner cutoffs. Nineteen mature trees, including three oak trees will need to either be removed or root pruned.

The Green Street project extends from 490 feet west of Madre Street to 350 feet east of Madre Street. Along these limits, the existing pavement width of Green Street is 30 feet. There are no curbs, gutters, or sidewalks present except at the intersection with Madre Street. The roadway pavement is in fair to poor condition with many visible cracks. The proposed work involves reconstructing the roadway with 4-inch asphalt concrete on 6-inch crushed miscellaneous base at a new width of 34 feet and installing new curb, gutter, and sidewalks. New curb returns and ramps will be constructed at the intersection with Madre Street. Corner cutoffs will be required to enable construction of the four 25-foot radius County standard curb returns. Acquisition of right of way will be necessary for these corner cutoffs. Ten mature trees will need to either be removed or root pruned.

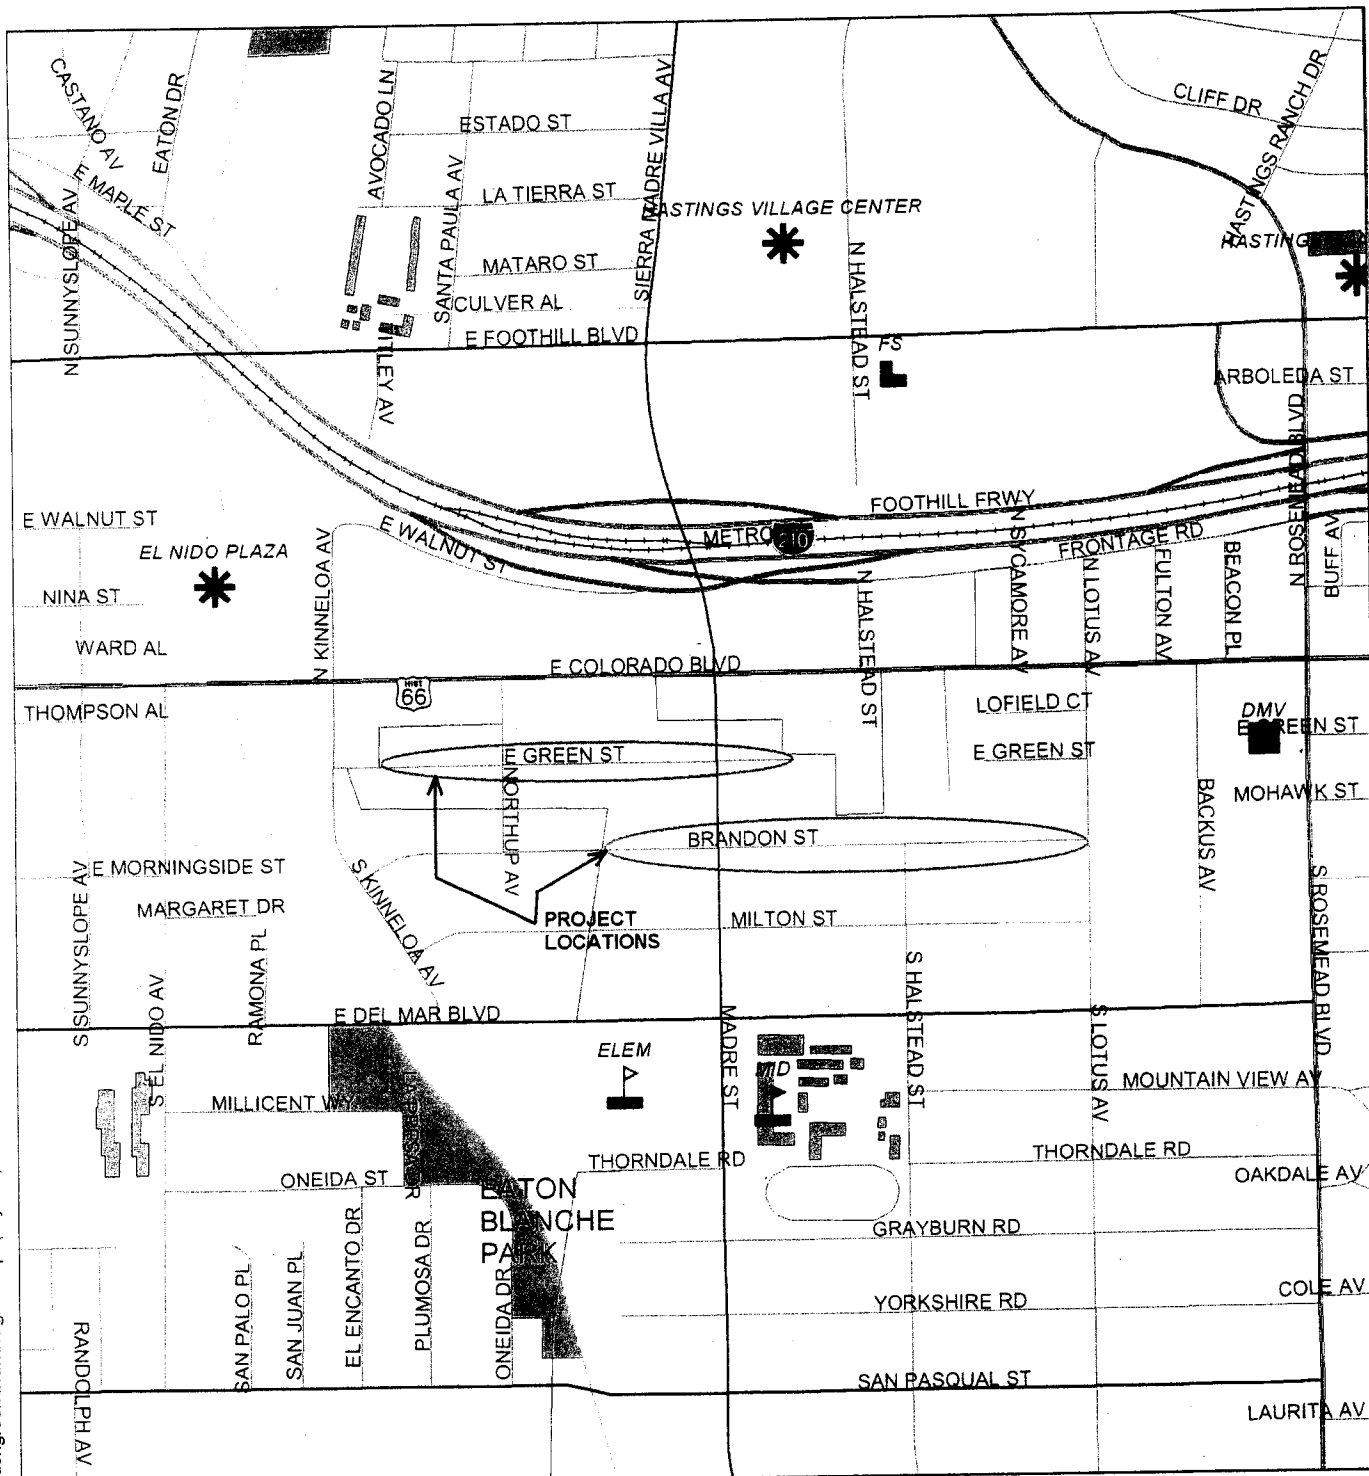

9. **Surrounding Land Use and Settings:**

A. Project Site - There are two different locations on two different streets for the projects. The topography of the projects is generally flat with two-lane local streets - one lane of traffic in each direction.

B. Surrounding Properties - The area surrounding the project sites are urban residential neighborhoods. The surrounding topography is generally flat. The vegetation in the surrounding area consists of mature trees, shrubs, and grass, and animal life consisting of rodents, birds, insects, and domesticated cats and dogs.

10. **Other agencies whose approval is required (and permits needed):** County of Los Angeles Department of Regional Planning - Oak Tree Permit

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" or "Potentially Significant Unless Mitigated," as indicated by the checklist on the following pages.

<input type="checkbox"/> Aesthetics	<input type="checkbox"/> Agriculture Resources	<input type="checkbox"/> Air Quality
<input type="checkbox"/> Biological Resources	<input type="checkbox"/> Cultural Resources	<input type="checkbox"/> Geology/Soils
<input type="checkbox"/> Hazards & Hazardous Materials	<input type="checkbox"/> Hydrology/Water Quality	<input type="checkbox"/> Land Use/Planning
<input type="checkbox"/> Mineral Resources	<input type="checkbox"/> Noise	<input type="checkbox"/> Population/Housing
<input type="checkbox"/> Public Services	<input type="checkbox"/> Recreation	<input type="checkbox"/> Transportation/Traffic
<input type="checkbox"/> Utilities/Service Systems	<input type="checkbox"/> Mandatory Findings of Significance	

DETERMINATION: (To be completed by the Lead Agency)

On the basis of this initial evaluation:

- ☒ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- ☐ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
- ☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
- ☐ I find that the proposed project MAY have a potentially significant impact or potentially significant unless mitigated impact on the environment, but at least one effect a) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and b) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
- ☐ I find that although the proposed project would have a significant effect on the environment because all potentially significant effects (a) have been analyzed adequately in an earlier ENVIRONMENTAL IMPACT REPORT or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier ENVIRONMENTAL IMPACT REPORT or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

EVALUATION OF ENVIRONMENTAL IMPACTS

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved including off-site as well as on-site, cumulative as well as project level, indirect as well as direct, and construction as well as operational impacts.
- 3) "Potential Significant Impact" is appropriate if an effect is significant or potentially significant or if the lead agency lacks information to make a finding of insignificance. If there are one or more "Potential Significant Impact" entries when the determination is made, an Environmental Impact Report (EIR) is required.
- 4) "Less Than Significant With Mitigation Incorporation" applies where the incorporation of mitigation measures has reduced an effect from "Potential Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures and briefly explain how they reduce the effect to a less than significant level (mitigation measures from Section XVIII, "Earlier Analysis," may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other California Environmental Quality Act process, an effect has been adequately analyzed in an earlier EIR or Negative Declaration. Section 15063(c)(3)(D). Earlier analyses are discussed in Section XVIII at the end of the checklist.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). See the sample question below. A source list should be attached and other sources used or individuals contacted should be cited in the discussion.

ENVIRONMENTAL CHECKLIST FORM

			Potential Significant Impact	Less Than Significant With Mitigation Incorporation	Less Than Significant Impact	No Impact
I. <u>AESTHETICS</u> - Would the project:						
	a)	Have a substantial adverse effect on a scenic vista?				X
	b)	Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a State scenic highway?				X
	c)	Substantially degrade the existing visual character or quality of the site and its surroundings?				X
	d)	Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?				X
II. <u>AGRICULTURE RESOURCES</u> - In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. Would the project:						
	a)	Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to nonagricultural use?				X
	b)	Conflict with existing zoning for agricultural use or a Williamson Act contract?				X
	c)	Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland to nonagricultural use?				X

		Potential Significant Impact	Less Than Significant With Mitigation Incorporation	Less Than Significant Impact	No Impact
III. AIR QUALITY - Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:					
a)	Conflict with or obstruct implementation of the applicable air quality plan?				X
b)	Violate any air quality standard or contribute substantially to an existing or projected air quality violation?			X	
c)	Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is nonattainment under an applicable Federal or State ambient air quality standard (including releasing emissions which exceed quantitative thresholds for zone precursors)?				X
d)	Expose sensitive receptors to substantial pollutant concentrations?			X	
e)	Create objectionable odors affecting a substantial number of people?			X	
IV. BIOLOGICAL RESOURCES - Would the project:					
a)	Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?				X
b)	Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?				X
c)	Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?				X

		Potential Significant Impact	Less Than Significant With Mitigation Incorporation	Less Than Significant Impact	No Impact
	d)	Interfere substantially with the movement of any native resident, migratory fish, or wildlife species; or with established native resident or migratory wildlife corridors; or impede the use of native wildlife nursery sites?			X
	e)	Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?		X	
	f)	Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or State habitat conservation plan?			X
V. CULTURAL RESOURCES - Would the project:					
	a)	Cause a substantial adverse change in the significance of a historical resource as defined in Section 15064.5?			X
	b)	Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?			X
	c)	Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?			X
	d)	Disturb any human remains, including those interred outside of formal cemeteries?			X
VI. GEOLOGY AND SOILS - Would the project:					
	a)	Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:			X
	i)	Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State geologist for the area or based on other substantial evidence of a know fault? Refer to Division of Mines and Geology Special Publication 42.			X
	ii)	Strong seismic ground shaking?			X
	iii)	Seismic-related ground failure, including liquefaction?			X

			Potential Significant Impact	Less Than Significant With Mitigation Incorporation	Less Than Significant Impact	No Impact
		iv) Landslides?				X
	b)	Result in substantial soil erosion or the loss of topsoil?			X	
	c)	Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction, or collapse?				X
	d)	Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?				X
	e)	Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?				X

VII. HAZARDS AND HAZARDOUS MATERIALS - Would the project:

	a)	Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?				X
	b)	Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?			X	
	c)	Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?			X	
	d)	Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code, Section 65962.5, and, as a result, would it create a significant hazard to the public or the environment?				X
	e)	For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?				X

			Potential Significant Impact	Less Than Significant With Mitigation Incorporation	Less Than Significant Impact	No Impact
	f)	For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?				X
	g)	Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?			X	
	h)	Expose people or structures to a significant risk of loss, injury, or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?				X
VIII. <u>HYDROLOGY AND WATER QUALITY</u> - Would the project:						
	a)	Violate any water quality standards or waste discharge requirements?			X	
	b)	Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of preexisting nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?				X
	c)	Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?				X
	d)	Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?				X
	e)	Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?				X
	f)	Otherwise substantially degrade water quality?				X

			Potential Significant Impact	Less Than Significant With Mitigation Incorporation	Less Than Significant Impact	No Impact
	g)	Place housing within a 100-year flood hazard area as mapped on a Federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?				X
	h)	Place within a 100-year flood hazard area structures which would impede or redirect flood flows?				X
	i)	Expose people or structures to a significant risk of loss, injury, or death involving flooding, including flooding as a result of the failure of a levee or dam?				X
	j)	Inundation by seiche, tsunami, or mudflow?				X
IX. LAND USE AND PLANNING - Would the project:						
	a)	Physically divide an established community?				X
	b)	Conflict with any applicable land use plan, policy, or regulation of any agency with jurisdiction over the project (including, but not limited to, the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?				X
	c)	Conflict with any applicable habitat conservation plan or natural community conservation plan?				X
X. MINERAL RESOURCES - Would the project:						
	a)	Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the State?				X
	b)	Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?				X
XI. NOISE - Would the project result in:						
	a)	Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or ordinance or applicable standards of other agencies?			X	
	b)	Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?			X	

			Potential Significant Impact	Less Than Significant With Mitigation Incorporation	Less Than Significant Impact	No Impact
	c)	A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?				X
	d)	A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?			X	
	e)	For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?				X
	f)	For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?				X

XII. POPULATION AND HOUSING - Would the project:

	a)	Induce substantial population growth in an area, either directly (e.g., by proposing new homes and businesses) or indirectly (e.g., through extension of roads or other infrastructure)?				X
	b)	Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?				X
	c)	Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?				X

XIII. PUBLIC SERVICES -

	a)	Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times, or other performance objectives for any of the public services:				
		Fire protection?				X
		Police protection?				X

			Potential Significant Impact	Less Than Significant With Mitigation Incorporation	Less Than Significant Impact	No Impact
		Schools?				X
		Parks?				X
		Other public facilities?				X
XIV. RECREATION -						
	a)	Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?				X
	b)	Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?				X
XV. TRANSPORTATION/TRAFFIC - Would the project:						
	a)	Cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a substantial increase in either the number of vehicle trips, the volume to capacity ratio on roads, or congestion at intersections)?			X	
	b)	Exceed, either individually or cumulatively, a level of service standard established by the County Congestion Management Agency for designated roads or highways?				X
	c)	Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?				X
	d)	Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?				X
	e)	Result in inadequate emergency access?				X
	f)	Result in inadequate parking capacity?				X
	g)	Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)?				X

			Potential Significant Impact	Less Than Significant With Mitigation Incorporation	Less Than Significant Impact	No Impact
XVI. UTILITIES AND SERVICE SYSTEMS - Would the project:						
	a)	Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?				X
	b)	Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?				X
	c)	Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?				X
	d)	Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?				X
	e)	Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?				X
	f)	Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?				X
	g)	Comply with Federal, State, and local statutes and regulations related to solid waste?				X
XVII. MANDATORY FINDINGS OF SIGNIFICANCE -						
	a)	Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory?				X

		Potential Significant Impact	Less Than Significant With Mitigation Incorporation	Less Than Significant Impact	No Impact
XVII. MANDATORY FINDINGS OF SIGNIFICANCE -					
	a)	Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory?			X
	b)	Does the project have impacts that are individually limited, but cumulatively Considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)			X
	c)	Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?			X

XVIII. DISCUSSION OF WAYS TO MITIGATE SIGNIFICANT EFFECTS -

Section 15041 (a) of the State CEQA guidelines states that a lead agency for a project has authority to require changes in any or all activities involved in the project in order to lessen or avoid significant effects on the environment. No significant effects have been identified. However, the following standard mitigation measures have been included:

Air Quality

- Compliance with applicable air pollution control regulations.

Noise

- Compliance with all applicable noise ordinances during construction.
- Construction activities would be restricted to the County appointed construction times.

Transportation

- Advance notification of all street and/or lane closures and detours to all emergency service agencies and affected residents.

ATTACHMENT A
DISCUSSION OF ENVIRONMENTAL FACTORS
BRANDON STREET AND GREEN STREET

I. AESTHETICS - Would the proposal:

a) *Have a substantial adverse effect on a scenic vista?*

No impact. The proposed project areas do not represent unique scenic vistas within the unincorporated area of East Pasadena. Therefore, the projects will have no impact on a scenic vista.

b) *Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a State scenic highway?*

No impact. The proposed projects will not affect a scenic highway. Therefore, the projects will have no impact on scenic resources within a State scenic highway.

c) *Substantially degrade the existing visual character or quality of the site and its surroundings?*

No impact. The project areas currently suffer visually because vehicles park on the unpaved shoulder at the side of the road. By widening the road to allow parking and constructing curbs, gutters, and sidewalks, we are enhancing the visual quality of the neighborhood. Thus, no significant adverse visual impacts are anticipated to occur from the implementation of the projects.

d) *Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?*

No impact. The proposed projects will not introduce any additional lighting systems. Therefore, the proposed projects will have no impact on nighttime views in the area.

II. AGRICULTURE RESOURCES - Would the proposal:

a) *Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to nonagricultural use?*

No impact. The proposed projects are located within residential area, which is presently developed. The project locations are not used for agricultural purposes or as a farmland. Thus, the projects will have no impact on farmland.

b) *Conflict with existing zoning for agricultural use or a Williamson Act contract?*

No impact. The proposed projects will not conflict with any zoning for agricultural use. Thus, the projects will not impact any existing zoning for agricultural use.

c) *Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to nonagricultural use?*

No impact. The proposed projects do not involve changes in the existing environment that could result in the conversion of farmland to nonagricultural use.

III. AIR QUALITY - Would the proposal:

a) *Conflict with or obstruct implementation of the applicable air quality plan?*

No impact. The County of Los Angeles Department of Public Works currently complies with dust control measures enforced by the South Coast Air Quality Management District. The proposed projects will not conflict with the current implementation of the applicable air quality plan.

b) *Violate any air quality standard or contribute substantially to an existing or projected air quality violation?*

Less than significant impact. Construction-related emissions and dust would be emitted during project construction. However, the effect would be temporary and would not significantly alter the ambient air quality of the area. Construction activities would be restricted to the construction times allowed by the County of Los Angeles Department of Public Works. The project specifications would require the contractor to control dust by appropriate means such as sweeping and/or watering and comply with applicable air pollution regulations. The impacts would be temporary and considered less than significant.

- c) ***Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is nonattainment under an applicable Federal or State ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?***

No impact. Construction of the proposed projects will not lead to emissions which exceed thresholds for ozone precursors. The projects will not increase vehicle trips or impact traffic conditions. Therefore, the proposed projects will have no impact on ambient air quality.

- d) ***Expose sensitive receptors to substantial pollutant concentrations?***

Less than significant impact. Two schools, one an elementary school and a high school, are located two blocks south of the project areas. These areas are close enough to the project location to be potentially subjected to dust and construction equipment emissions during project construction. Project specifications would require the contractor to control dust by appropriate means such as sweeping and/or watering, and comply with all applicable air pollution control regulations. The impact is considered to be less than significant since the exposure would be temporary and precautions will be taken to mitigate exposure to pollutants.

- e) ***Create objectionable odors affecting a substantial number of people?***

Less than significant impact. Objectionable odors may be generated by diesel trucks used for the construction of the projects. These types of odors will be short-term and temporary. Therefore, the impact of creating objectionable odor is considered less than significant.

IV. **BIOLOGICAL RESOURCES - Would the proposal:**

- a) ***Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?***

No impact. No sensitive or special status species, or any species identified as a candidate in local or regional plans or by the California Department of Fish and Game or the U.S. Fish and Wildlife Service are known to exist at the project sites. Thus, the proposed projects will have no impact on sensitive or special status species or their respective habitat.

- b) ***Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?***

No impact. The projects will be constructed along a developed residential area. No impacts to a riparian habitat or other sensitive natural community would occur.

- c) ***Have a substantial adverse effect on Federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?***

No impact. The proposed projects do not involve a wetland habitat. Therefore, the proposed projects will not impact wetland habitat.

- d) ***Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?***

No impact. The proposed project sites are not known to be corridors for any native residential or migratory fish or wildlife species. The projects would be constructed in a developed residential area. Therefore, there will be no impact on resident or migratory fish or wildlife nursery sites.

- e) ***Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?***

Less Than Significant Impact. On Brandon Street, at least three oak trees will need to be removed or root pruned. An oak tree permit will be obtained from the County of Los Angeles Department of Regional Planning to ensure that all the concerns and requirements with regards to the oak tree ordinance are addressed and complied with. Therefore, the proposed projects will have less than significant impact on local policies and ordinances which protect biological resources.

- f) ***Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?***

No impact. No known adopted habitat conservation plan or natural community conservation plan exists within the project sites. Therefore, the proposed projects will have no impact on any of these plans.

V. CULTURAL RESOURCES - Would the proposal:

- a-d) *Cause a substantial adverse change in the significance of a historical or archaeological resource, directly or indirectly destroy a unique paleontological resource, site or geologic feature, or disturb any human remains, including those interred outside formal cemeteries?***

No impact. No known paleontological, archaeological, and historical resources exist in the project areas. However, if any cultural resources, including human remains, are discovered during construction, the contractor shall cease the operation and contact a specialist to examine the project sites as required by project specifications. Thus, the effects of the proposed projects on these resources are not considered significant.

VI. GEOLOGY AND SOILS - Would the proposal:

- a) *Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:***

- i) *Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.***

No impact. There are no known active faults underlying the project sites, and we do not anticipate a fault rupture occurring at the project sites.

- ii) *Strong seismic ground shaking?***

No impact. The proposed projects require some excavation and compaction of earth. The project areas have not been the epicenter of any known earthquake. Thus, the activities related to the projects will not trigger strong seismic ground shaking.

- iii) *Seismic-related ground failure, including liquefaction?***

No impact. The project areas are not known to have suffered any liquefaction or identified as a potential liquefaction area. Thus, the proposed projects will have no impact on liquefaction.

iv) Landslides?

No impact. The project locations are in developed residential areas with no potential for landslides. Therefore, the proposed projects will have no impact on landslides.

b) Result in substantial soil erosion or the loss of topsoil?

Less than significant impact. Construction of the proposed projects will result in the disruption of a limited amount of soil. Project specifications would require the contractor to properly compact the earth and properly dispose of any excess excavated materials. The existing topography will not significantly be altered by the construction of the sidewalks. Therefore, the proposed projects will have less than significant impact on the loss of top soil or soil erosion.

c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on-or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?

No impact. The proposed project sites are not known to be on soil that is unstable. Project specifications will require the contractor to dispose of surplus materials in accordance to all applicable Federal, State, or local regulations. Thus, the projects will have no impact on unstable soil or geologic unit.

d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?

No impact. The soil at the project locations are not considered expansive. Soil expansion is not expected at the proposed project sites. Therefore, the proposed projects will not impact soil expansion.

e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?

No impact. There are no septic tanks or sewer pipes proposed for the project. Therefore, the projects will have no impact on inadequate soils.

VII. HAZARDS AND HAZARDOUS MATERIALS - Would the proposal:

- a) ***Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?***

No impact. The proposed projects do not involve the routine transport, use, or disposal of hazardous materials. Therefore, the projects will have no impact on the transport, use, or disposal of hazardous materials.

- b-c) ***Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment or emit hazardous emissions or handle hazardous materials, substances or wastes within one quarter mile of an existing or proposed school?***

Less than significant impact. Combustion engine fluids from the construction equipment are potentially hazardous substances. Necessary precautions will be taken to prevent the spillage of any hazardous substances that may affect the public or the environment at the project sites. It is unlikely that an explosion, emission, or release of hazardous or acutely hazardous substances could occur as a result of the proposed projects. Project specifications would require the contractor to properly maintain all equipment during construction. In the event of any spills of fluids, the contractor is required to remediate according to all applicable laws regarding chemical clean up. The proposed projects are not anticipated to result in hazardous emissions or a hazardous substance spillage, thus the project impact on the public or environment is considered to be less than significant.

- d) ***Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code, Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?***

No impact. The project sites are not known to be hazardous materials sites. Therefore, the proposed projects will have no impact on hazardous materials.

- e) ***For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?***

No impact. The proposed projects are not located within an airport land use plan or within two miles of a public use airport. The proposed projects could not result in a safety hazard for people residing or working in the project areas.

- f) ***For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?***

No impact. The proposed projects are not located within the vicinity of a private airstrip. Thus, the proposed projects will have no impact relating to airstrip safety for people residing or working in the project areas.

- g) ***Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?***

Less than significant impact. Emergency access will be available at all times during construction. The project specifications will require the contractor to give advance notice of all street closures and detours to all emergency service agencies if street closures become necessary. Therefore, the impact of the proposed projects on an emergency response plan or emergency evacuation plan is considered less than significant.

- h) ***Expose people or structures to a significant risk of loss, injury, or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?***

No impact. The project sites are in a developed residential area with no flammable brush wildlands located in the vicinity. Thus, the proposed projects will not expose people or structures to a risk involving wildland fires.

VIII. HYDROLOGY AND WATER QUALITY - Would the proposal:

- a) ***Violate any water quality standards or waste discharge requirements?***

Less than Significant impact. The proposed projects are not anticipated to have an effect on the water quality standards or waste discharge requirements within a water body. The contractor is required to implement Best Management Practices as required by the National Pollutant Discharge Elimination System permit issued to the County by the Regional Water Quality Control Board to minimize construction impacts on water quality. Therefore, the projects will have less than significant impact on water quality.

- b) ***Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?***

No impact. The proposed projects will not result in the use of any water that would result in a net deficit in aquifer volume or a lowering of the groundwater table level. Therefore, the proposed projects will have no impact on groundwater supplies or groundwater recharge.

- c-d) ***Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site or in a manner that would increase the rate or amount of surface runoff to cause flooding on- or off-site?***

No impact. The proposed projects will involve resurfacing of existing road surfaces and construction of new curb, gutter, and sidewalks. The construction does not represent a significant change in the topography of the ground surface. Construction of the curb and gutter will actually increase the efficiency of drainage from the project sites while reducing any possible erosion or siltation on- or off-site. Therefore, the proposed projects will have no impact on erosion, siltation, or on the rate of surface runoff.

- e) ***Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?***

No impact. The construction of the projects will not result in additional surface water runoff. Therefore, the projects will have no impact on the capacity of existing stormwater drainage systems.

- f) ***Otherwise substantially degrade water quality?***

No impact. The proposed projects will involve resurfacing of existing road surfaces, and construction of new curb, gutter, and sidewalks. The contractor will adhere to applicable Best Management Practices to minimize any degradation to water quality during construction. Therefore, the projects are not expected to generate contaminated surface water quality.

- g) ***Place housing within a 100-year flood hazard area as mapped on a Federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?***

No impact. The proposed projects will not create new housing so implementation of the proposed projects will not place any housing within a 100-year flood hazard area.

- h) ***Place within a 100-year flood hazard area structures which would impede or redirect flood flows?***

No impact. The proposed projects will not place any structures within a 100-year flood hazard area, which would impede or redirect flood flows.

- i) ***Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?***

No impact. The proposed projects will not expose people or structures to a significant risk of loss, injury, or death involving flooding.

- j) ***Inundation by seiche, tsunami, or mudflow?***

No impact. The proposed projects will not cause any inundation by seiche, tsunami, or mudflow.

IX. LAND USE AND PLANNING - Would the proposal:

- a) ***Physically divide an established community?***

No impact. The projects will not introduce a barrier which would divide the physical arrangement of the established community.

- b) ***Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?***

No impact. The projects do not conflict with any applicable land use plan, policy, or regulation of the County of Los Angeles.

- c) ***Conflict with any applicable habitat conservation plan or natural community conservation plan?***

No impact. The proposed projects do not conflict with any habitat conservation plan or natural community conservation plan adopted by any agency or community.

X. MINERAL RESOURCES - Would the proposal:

- a) ***Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?***

No impact. The proposed projects would not deplete any known mineral resource and would, therefore, have no impact on mineral resources.

- b) ***Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?***

No impact. The project sites are not identified as a mineral resource recovery site in the local general plan, specific plan, or other land use plan. Therefore, the proposed projects will have no impact on a locally-important mineral resource recovery site.

XI. NOISE - Would the proposal result in:

- a) ***Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?***

Less than significant impact. The noise level within the proposed project sites will increase during construction. However, the impact is temporary and will be subject to existing noise ordinances and standards set by the U.S. Occupational Safety and Health Administration. Since the construction period will last for a short period, the impact to noise levels is considered less than significant.

- b) ***Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?***

Less than significant impact. Excavation and compaction during construction could generate limited and temporary groundborne vibration or groundborne noise vibration. However, the project specifications would

require the contractor to comply with all noise laws and ordinances. The project impact would be considered less than significant since construction would be for a short period and would not expose people to severe noise levels.

- c) ***A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?***

No impact. There will be no substantial permanent increase in the ambient noise level due to the proposed projects. Therefore, the projects will have no impact on permanent noise increase.

- d) ***A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?***

Less than significant impact. During the construction phase of the projects, there will be a nominal increase in existing noise levels due to construction and transportation of material to and from the project sites. Construction activities will be limited to normal County and/or City regulated hours. Due to the short-term nature of the projects, the impact will be less than significant.

- e-f) ***For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels or for a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?***

No impact. The proposed projects are not located within two miles of a public airport or in the vicinity of an airport land use plan.

XII. POPULATION AND HOUSING - Would the proposal:

- a) ***Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?***

No impact. The proposed projects are in a developed residential area and will not increase traffic capacity. The projects will not encourage a population growth in the project areas.

- b-c) *Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere or displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?***

No impact. The proposed projects will not displace existing houses nor displace people and create a demand for housing. Therefore, the projects will have no impact on housing.

XIII. PUBLIC SERVICE - Would the proposal:

- a) *Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times, or other performance objectives for any of the public services: Fire protection, police protection, schools, parks, other public facilities?***

No impact. The projects will not affect public service and will not result in a need for new or altered governmental services in fire protection, police protection, schools, parks, or other public facilities.

XIV. RECREATION - Would the proposal:

- a) *Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?***

No impact. The proposed projects will not increase the use of existing neighborhood or regional parks.

- b) *Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?***

No impact. The proposed projects do not include recreational facilities and will not require the construction or expansion of any recreational facilities.

XV. TRANSPORTATION/TRAFFIC - Would the proposal:

- a) ***Cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a substantial increase in either the number of vehicle trips, the volume to capacity ratio on roads, or congestion at intersections)?***

Less than significant impact. The proposed projects may require disposal of excavated material and transportation of construction equipment to the project sites. This could minimally increase the existing traffic. However, this impact is only for the duration of construction and is, therefore, temporary and short-lived. Thus, the impact would be considered less than significant.

- b) ***Exceed, either individually or cumulatively, a level of service standard established by the County congestion management agency for designated roads or highways?***

No impact. The proposed projects will not directly or indirectly cause traffic to exceed a level of service standard established by the County Congestion Management Agency for roads or highways in the project areas.

- c) ***Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?***

No impact. The proposed projects will have no impact on air traffic patterns.

- d) ***Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?***

No impact. The proposed projects will not affect traffic flows or patterns. Therefore, the proposed projects will have no impact on increasing hazards due to a design feature.

- e) ***Result in inadequate emergency access?***

No impact. Emergency access will be maintained at all times. The contractor will be required to notify all emergency facilities and emergency service providers of any road closure. No road closures are foreseeable and no major traffic impact are anticipated. Therefore, the proposed projects will have no impact on emergency access.

f) *Result in inadequate parking capacity?*

No impact. The projects will not result in parking restrictions. Therefore, the impact on parking capacity is not considered significant.

g) *Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)?*

No impact. The proposed projects will not conflict with adopted policies, plans, or programs supporting alternative transportation.

XVI. UTILITIES AND SERVICE SYSTEMS - Would the proposal:

a) *Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?*

No impact. The projects will not result in contamination or an increase in discharge of wastewater that might affect wastewater treatment. Thus, the proposed projects will have no impact on the wastewater treatment requirements of the Regional Water Quality Control Board.

b) *Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?*

No impact. The proposed projects will not result in the construction of new water or wastewater treatment facilities. Therefore, no impact is anticipated.

c) *Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?*

No impact. No new storm drainage facilities will be required as a result of the project. Therefore, no new storm water drainage facilities or expansion of existing facilities.

d) *Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?*

No impact. The proposed projects will not result in a need for additional water supplies. Therefore, the projects will have no impact on existing water supply entitlements and resources.

- e) ***Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?***

No impact. No increase in the number of wastewater discharge facilities will occur as a result of the proposed projects. Therefore, the proposed projects will have no impact on wastewater treatment.

- f-g) ***Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs and comply with Federal, State, and local statutes and regulations related to solid waste?***

No impact. Construction of the proposed projects may result in excess excavated materials and construction debris. However, the amount of solid waste generated will be minimal. Project specifications will require the contractor to dispose of these materials in accordance with all applicable Federal, State, or local regulations related to solid waste. The proposed projects will not result in a facility that would generate solid waste. Therefore, there will be no impact on landfill capacity.

XVII. MANDATORY FINDINGS OF SIGNIFICANCE - Would the proposal:

- a) ***Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?***

No impact. Based on findings in this environmental review, the proposed projects do not have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish and wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, or eliminate important examples of the major periods of California history or prehistory. Therefore, the proposed projects will have no impact on the quality of the environment.

- b) ***Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that***

the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects?)

No impact. The proposed projects will not have impacts that are individually limited, but cumulatively considerable.

- c) ***Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?***

No impact. The proposed projects will not have a direct or indirect detrimental environmental impact on human beings.

P:\pdpub\Temp\EP&A\Enviromental Unit\Projects\Brandon Street\Brandon & Green ND\DISCUSSION.wpd

**CALIFORNIA DEPARTMENT OF FISH AND GAME
CERTIFICATE OF FEE EXEMPTION**

De Minimis Impact Finding

Project Title/Location (include County):

The Brandon Street and Green Street projects are located in the County of Los Angeles unincorporated area of East Pasadena.

Project Description:

The purpose of the proposed project is to reconstruct deteriorating roadway surfaces and to construct new curb, gutter, and sidewalk on Brandon Street and Green Street.

Findings of Exemption (attach as necessary):

An Initial Study for the subject project was prepared by the County of Los Angeles Department of Public Works pursuant to the California Environmental Quality Act of 1970 as amended (Division 13, California Public Resources Code) and the "State Environmental Impact Report Guidelines" (Division 6, California Administrative Code).

The Initial Study determined the subject project would not have a significant effect on wildlife resources, including:

- a. No significant effect changing the diversity of species or numbers of any species of animals.
- b. No significant effect reducing the numbers of any unique, rare, or endangered species of animals.
- c. No significant effect introducing new species of animals into an area, or resulting in a barrier to the migration or movement of animals.
- d. No significant effect deteriorating an existing fish or wildlife habitat.

Certification:

I hereby certify that the public agency has made the above finding and that the project will not individually or cumulatively have an adverse effect on wildlife resources as defined in Section 711.2 of the Fish and Game Code.

PATRICK V. DeCHELLIS

Title: Assistant Deputy Director

Lead Agency: LACDPW

Date: _____

NOTICE OF INTENT TO ADOPT

NEGATIVE DECLARATION

BRANDON STREET AND GREEN STREET

The County of Los Angeles Department of Public Works has prepared a Negative Declaration to assess the proposed project impacts to the environment and the community. The proposed project is located in the unincorporated area of East Pasadena.

The proposed project consists of the reconstruction of deteriorating roadway and the construction of new curb, gutter, and sidewalk on Brandon Street and Green Street.

The Brandon Street project extends from 510 feet west of Madre Street, east to Lotus Avenue. Brandon Street is 30 feet wide from edge of pavement to edge of pavement and does not have sidewalk, or curb and gutter, except for a 250-foot section on the south side of the street. The existing pavement is in fair to poor condition with longitudinal cracks evident. The work will involve reconstructing the roadway surface with 4-inch asphalt concrete on 6-inch crushed miscellaneous base to a new width of 40 feet and constructing new curb, gutter, and sidewalk along the extent of the project. Corner cutoffs will be required to provide a total of eight 25-foot radius County standard curb returns. Acquisition of right of way will be necessary for these corner cutoffs. Nineteen mature trees including three oak trees will need to either be removed or root pruned.

The Green Street project extends from 490 feet west of Madre Street to 350 feet east of Madre Street. Along these limits, the existing pavement width of Green Street is 30 feet. There are no curbs, gutters, or sidewalks present except at the intersection with Madre Street. The roadway pavement is in fair to poor condition with many visible cracks. The proposed work involves reconstructing the roadway with 4-inch asphalt concrete on 6-inch crushed miscellaneous base at a new width of 34 feet and installing new curb, gutter, and sidewalks. New curb returns and ramps will be constructed at the intersection with Madre Street. Corner cutoffs will be required to enable construction of the four 25-foot radius County standard curb returns. Acquisition of right of way will be necessary for these corner cutoffs. Ten mature trees will need to either be removed or root pruned.

The draft Negative Declaration and Initial Study are being circulated for a 20-day public review period. The review period will end August 14, 2003.

A copy of the document is available for public review at the following locations:

Sierra Madre Public Library
440 West Sierra Madre Boulevard
Sierra Madre, CA 910024

County of Los Angeles
Department of Public Works
Programs Development Division
900 South Fremont Avenue, 11th Floor
Alhambra, CA 91803-1331

Interested parties may submit their comments to:

Mr. Mark Nugent
County of Los Angeles
Department of Public Works
Programs Development Division
P.O. Box 1460
Alhambra, CA 91802-1460

The final Negative Declaration will incorporate responses to written comments received during the public review period and will be considered by the Board of Supervisors for approval.

Questions regarding this notice should be directed to Mr. Mark Nugent of our Programs Development Division at (626) 458-5957, Monday through Thursday, between 7:15 a.m. and 6 p.m.

Upon 72 hours' notice, Public Works can provide program information and publications in alternate formats or make other accommodations for people with disabilities. In addition, program documents are available at our main office in Alhambra (900 South Fremont Avenue), which is accessible to individuals with disabilities. To request accommodations ONLY or for more American with Disability Act information, please contact our departmental American with Disability Act Coordinator at (626) 458-4081 or TDD (626) 282-7829, Monday through Thursday, from 7 a.m. to 5:30 p.m.

Con 72 horas de noticia, el Departamento puede proveerle informacion y publicaciones sobre el programa y formatos alternativos o hacer adaptaciones para incapacitados. Ademas, documentacion sobre el programa esta disponible en nuestra oficina principal en Alhambra (900 South Avenue Fremont), la cual es accessible para individuos con incapacidades. Para solicitar adaptaciones SOLAMENTE o para mas informacion del ADA, pongase en contacto con nuestro Coordinador del ADA del Departamento al (626) 458-4081 o TDD (626) 282-7829, de Lunes a Jueves de las 7 a.m. a 5:30 p.m.

P:\pdpub\Temp\EP&A\Environmental Unit\Projects\Brandon Street\Brandon & Green ND\Public Notice.wpd

**PROGRAM FOR REPORTING AND MONITORING THE
IMPLEMENTATION OF ENVIRONMENTAL
MITIGATION MEASURES**

BRANDON STREET AND GREEN STREET

The project includes other standard mitigation measures as discussed in Section XVIII of the Negative Declaration.

1.0 Program Management

- 1.1 After adoption of environmental mitigation measures by the Board of Supervisors, the Department of Public Works shall designate responsibility for monitoring and reporting compliance with each mitigation measure. Responsibility for monitoring and reporting compliance with mitigation measures, if any, shall be designated by Public Works as appropriate.
- 1.2 To facilitate implementation and enforcement of this program, Public Works shall ensure that the obligation to monitor and report compliance with environmental mitigation measures is required by all project-related contracts between the County and A/E, prime construction contractor, and any other person or entity who is designated to monitor and/or report compliance under this program during the preconstruction and construction phases.
- 1.3 Public Works as appropriate, shall take all necessary and appropriate measures to ensure that each project-related environmental mitigation measure, which was adopted, is implemented and maintained.

2.0 Pre-Construction

- 2.1 Public Works is responsible for incorporating mitigation measures into project design and confirming in writing that final construction drawings include all design-related mitigation measures.
- 2.2 Public Works is responsible for incorporating mitigation measures and confirming in writing that final construction drawings include all design-related mitigation measures.

3.0 Construction

- 3.1 Public Works or prime construction contractor for project and/or for project-related off-site improvements is responsible for constructing and/or monitoring the construction of mitigation measures incorporated in final construction documents and reporting instances of noncompliance in writing.

- 3.2 Public Works or prime construction contractor for project and/or for project-related off-site improvements is responsible for implementation and/or monitoring the implementation of mitigation measures affecting methods and practices of construction (e.g., hours of operation, noise control of machinery) and reporting instances of noncompliance in writing.
- 3.3 Public Works is responsible for monitoring compliance of prime construction contractor(s) with responsibility set forth in 3.1 above and reporting noncompliance in writing.

4.0 **Project Operation**

- 4.1 After completion and final acceptance of the project, Public Works is responsible for monitoring and maintaining compliance with adopted mitigation measures which affect project operation
